

LogisticSystem

One box - maximum flexibility!

LogisticSystem

For safe storage and transport

Optimizes and standardizes the working process for tool preparation! With rose plastic's LogisticSystem, tools of different lengths and diameters are clearly, safely and neatly packed in a box.

The LogisticSystem offers the greatest possible flexibility and security. In plants, it improves service and performance and helps to save costs and resources.

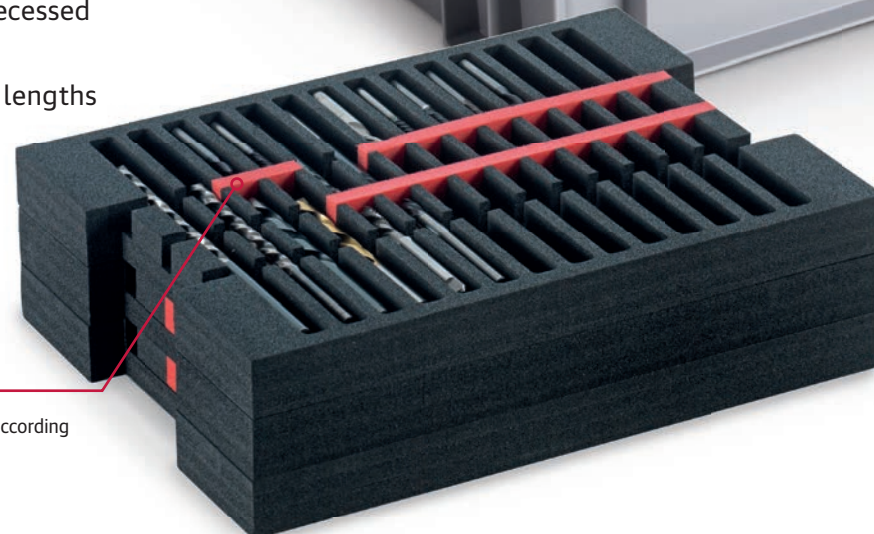

The tools can either be stored in the versatile, high-strength foam trays with high packing density or can be used in combination with the rose plastic SystemBoard. This can be placed directly into an immersion bath with the tools.

Foam trays

- can be used flexibly with different tool lengths and diameters
- made of high-strength material, with recessed grips
- adjustable separators for different tool lengths
- lower risk of injury due to flat lying tools during transport
- can be laser-engraved

SEPARATORS

individually shortenable according to your requirements

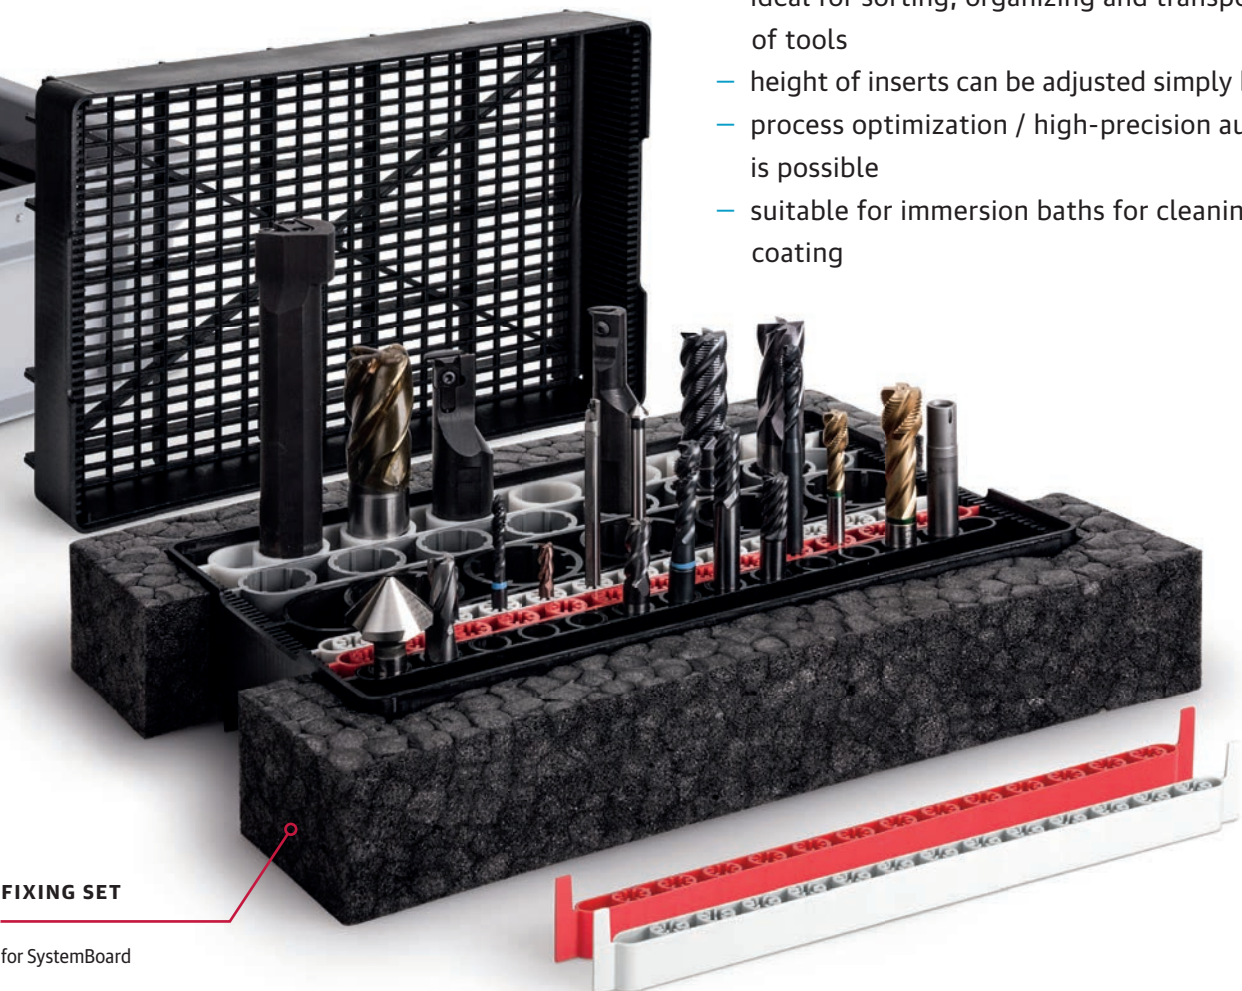

Boxes

- available in three sizes with padded lid
- boxes 175 and 235 can be combined with the SystemBoard
- standardized, stable and stackable box system
- can be labeled and combined with an optional trolley

SystemBoard

- ideal complement to boxes 175 and 235 for safe transport of tools in the LogisticSystem
- ideal for sorting, organizing and transporting of tools
- height of inserts can be adjusted simply by turning
- process optimization / high-precision automation is possible
- suitable for immersion baths for cleaning and coating
